

Le site d'escalade [www.nospot.org](http://www.nospot.org) désirait s'ouvrir à un mode communautaire transversal en permettant aux visiteurs de se connecter en natif via leur compte Gmail, Yahoo, etc.

Pragmawork a donc implémenté un module Google Friend Connect.

L'opération, très simple, ne nécessite que 30 minutes de travail et permet aux utilisateurs de poster commentaires, vidéos et messages privés.

The screenshot displays the Nospot website interface. At the top, the logo "NOSPOT" is visible alongside navigation links: Home, Spot, Tipé, Ton site, Communauté, Event, Photo (highlighted), VOD, Livres, Liens, and MR60. Below the navigation bar, a large photograph of a rocky mountain peak is shown, labeled "DSC03206". To the right of the main image is a sidebar with the text "EUD FRANCE" and a "Random Image" section featuring a smaller mountain photo and a search input field labeled "Cherche un pays...". Below the main image, there are navigation arrows and a location indicator: "You are in Moyenne Montagne Méribel 2008 - France". The bottom section is titled "Les commentaires de la communauté Nospot" and contains a "Commentaires(2)" box with a text input field for adding comments. Below this, two user comments are visible, each with a profile picture, a message, and a "Répondre" button. The first comment is by "Alain Robert" with the text "La légende de l'homme araignée" and a small image. The second comment is by "entorse et foulure... que de doux souvenirs!".
